PROLINE ALUMINIUM

Office fronts are usually designed to make the best possible use of the available space and lighting, and we can meet any design that you come up with. Aluminium provides an exceptional solution in the construction industry. ... Aluminium is the ideal medium to work with when constructing a office front.

OFFICE FRONTS

PARTITIONS

Glass partitions are a great option to enhance any workspace, adding practical functionality and a modern look all at once. This makes glass a very popular choice for modern office spaces.

Unlike brick walls or drywall partitioning, glass allows light to flow into work spaces and meeting rooms, while containing the sound and activity into specific areas.

Available in both framed and frameless systems, glass partitions offer great flexibility when it comes to design and configurations. They can be fitted with sliding doors, hinge doors, and even window leafs or sliding windows where necessary.

Whether you're looking to create additional offices, or meeting rooms, or create divisions within your offices, they can be created quickly and affordably through the installation of custom-designed glass partitions.

We manufacture and install shopfronts in a wide variety of styles, both internal shopfronts – in malls and office blocks – as well as external shopfronts for banks, shopping centres, showrooms, and independent retail stores.

We can accommodate extreme heights and have different profile systems to accommodate different heights. The emphasis is almost always on maximum glass sizes to cause least obstruction to the view.

The correct choice of shopfront can also significantly raise the value of your property. Aluminium and glass shopfronts require very little maintenance and will never rust or warp.

ALUMINIUM GATES

Aluminium gates are strong, beautiful and free from rot or rust. It is one of nature's miracle materials but it is light and easy to cut and shape. It can be welded, bonded, riveted or bolted together and it provides years of low to no maintenance in all weathers.

STAINLESS STEEL GATES

Stainless steel house gates are a good option when you want strong and sturdy entry, driveway, walkway or fence gates. Stainless steel gates provide extra security for a home. They are more costly than aluminum alternatives, but their structure and durability make them a long-lasting option that requires minimal upkeep. Stainless steel gates are available in a variety of styles, shapes and sizes, so you can choose a style that fits your decorating and security needs.

GARAGE DOORS

Maintenance free, weather resistant panels of exceptional rigidity and strength. These doors are perfectly suited for luxurious and up-market homes. Aluminium garage doors are the preferred choice of garage door due to the low maintenance requirements and of course the weight. The biggest advantage of using aluminium is the fact that it does not rust.

Hinged Aluminium doors are probably the most standard type of doors, hinged onto the door jamb either on the left or right, allowing them to open inward or outward. Hinged doors can be manufactured as single doors or double doors (french doors).

The outer frame is manufactured from sturdy extruded aluminium, while the centre section can be fitted with glass or aluminium cladding. These doors can also be manufactured in cottage pane style.

Hinged doors are the most natural choice for standard opening in homes or offices.

HINGED DOORS

HINGED DOOR+SIDE PANEL

Aluminium Hinge Doors are strong, durable and adds style to any space.

Single and Double hinged doors can be made to clients specifications. There are many different designs and styles that can be made from standard available profiles. With the added bonus of being able to put in stylish side panels.

For use as horizontal sliding windows for light commercial use such as external serving hatches in restaurants. Our serving hatches are tailored to individual needs and can be designed as aluminium framed windows on cylinders or as very small doors located at a certain height in the wall.

Sliding windows are also ideal for applications where increased ventilation is required or in applications which require an open sash that does not open to create an obstruction.

SERVING HATCH

SLIDING DOORS

Aluminium sliding doors have been around for quite some time and with good reason as well. They provide various benefits to any home. The most important factor is the fact that it lets in so much natural light. Having natural light entering your home reduces your electricity usage, as the demand for light is there throughout most of your day.

Aluminium sliding doors also create the illusion of a bigger area, due to the excess light and the open feel of it. They also provide a nice all-year-round view of the landscapes on the outside, but more importantly, you can watch your children play outside, as well as be included in parties outside on the patio.

One main concern to everyone is safety. The hook-over locking mechanism provides adequate locking abilities and the shatterproof safety glass causes less damage in the event of breaking. Aluminium sliding doors also provide easy access, saves space and looks modern, sleek and clean.

Stacking/Folding Doors can transform any room into an open environment. These doors provide you with security and protection against the elements when closed, and when open, they can expand your space and merge it with the outdoors.

Stacking and folding doors can close-up an opening and open it right back up again on your demand. These doors can be fitted with openers that can stack away with the door leaf to give you the biggest opening possible.

FOLDING DOORS

PIVOT DOORS

Aluminium Pivot Doors. The pivot door or entrance door is a customized door manufactured to individual requirements. This door features a pull handle with a key operated roller latch lock. ... The pivot door or entrance door is a customized door manufactured to individual requirements. Pivot doors are smooth, stylish, classy and sophisticated and can turn any front patio or entrance to a building into an eye-catching functional masterpiece.

PROLINE ALUMINIUM

STABLE DOOR

The stable door is a popular option for many kitchens and sculleries. It is a single hinge door that has been separated into a top half, which can be opened independently, and the bottom half which can be locked in place. A popular choice where ventilation is needed, yet pets for example need to be protected inside or kept out of the house.

FRAMELESS BALUSTRADES

Affordable and adaptable modular construction
Attractive and modern
Corrosion resistant
Available in a range of colors and finishes
Low maintenance

Many of the popular options contain no framework and no uprights, maximising on the clear view of and sheer magic of glass. This is the ideal solution for staircases or spaces where light is limited, as it creates the illusion of modern airiness and space through its transparency and appearance of suspended glass.

Frameless balustrades can be installed internally or externally, and are affixed to building structures in a few basic ways:

- Floor mounts,
- Side-mounts or
- Recessed options.

Stainless steel last longer and is a much safer option to decorate your house. Therefore, a stainless steel balustrade acts as safe railings and helps to make the staircase, and the location accident free. Stainless steel is rust free and stainless steel balustrades do not get affected by wear and tear. Stainless steel balustrade is durable and strong. Any kind of high temperatures or even heavy moisture does not affect the strength of the material. It tolerates everything without getting dented, chipped, or corroded. This ensures that the safety of the railings and supporting poles is not affected by any external changes.

ALUMINIUM SHOWERS

Aluminium frames are used in the manufacturing of framed showers, as it is resistant to corrosion. Aluminium framed showers cover the top, bottom and sides of the shower panels and doors. They are also fitted with seals, edges and magnets to ensure a watertight fit. Framed showers are available in in-line or corner units. Fixed framed panels can also be made up. The doors have a pivot or sliding option. Framed shower doors consist of an aluminium frame with either tempered or textured glass.

Planning a bathroom makeover? Our range of aluminium Framed or Frameless Showers will add a touch of luxury and style to any bathroom. Frameless shower doors gives a modern and elegant look and feel to a bathroom. They let in more light, both in the shower, as well as throughout the bathroom, it makes the space feel bigger and features the designs inside the shower more prominently. Frameless shower doors also gives you more design freedom and allows a wider range of styles and shapes.

Frameless shower doors are made from high quality, heavy-duty, polished or tempered glass that can resist scratching and chipping. These shower doors are also fitted with heavy duty hinges and can open inwards or outwards, depending on individual designs.

The biggest benefit of frameless showers, besides the modern, elegant look, is the fact that it's much easier to keep clean, as there are no grooves where soapy water can gather and result in mould. They also don't require harsh chemicals to clean with and can be wiped down with a squeegee after use.

FRAMELESS SHOWERS

INTERIOR DOOR

Interior door is a perfect door for use in any interior part of the home, the door style includes pocket Sliding, double, etched, bi-fold, sliding, bypass, bifold and even French. The modern design of frosted or mirror interior doors makes them good replacements for your wardrobe, bathroom as well as linen closets and other small areas in your home, including the laundry and pantry.

The interior door has been an outstanding designer addition not just in the bedroom, but in almost all spaces in the home. The contemporary design of the door is attributed to its laminated frosted or mirror glass which is functional as well as fabulous. The sliding door glides effortlessly. You'll enjoy both the practicality and modern look of this door. The glass construction allows a controlled amount of light to emit into the interior. Various decoration options are available such as frosted laundry room door, frosted panel interior doors, frosted doors for bedrooms as well as mirror finishes.

PROLINE ALUMINIUM

Aluminium has so many benefits and is therefore preferred in many industries, especially when it comes to constructing buildings or homes. This strong and durable material is ideal for the manufacturing of window frames, amongst other things, and will provide many benefits for years to come.

Benefits of Aluminium Windows:

Good thermal performance. Dust & Wind resistance.

It reduces the Carbon Footprint - Aluminium has one of the highest recycling rates of any metal and will not lose its quality during this process. Aluminium windows are also strong, durable and don't require a lot of maintenance.

They are also resistant to corrosion and can withstand harsh weather conditions. Contrasting to other window frame materials, aluminium window frames do not swell, split, crack or warp over time. This ensures an extended product life and in return saves you money.

Aluminium windows can be used anywhere, from your office buildings, to houses, old or new.

Compared to other materials and the maintenance they require, aluminium windows are the more affordable option.

Aluminium window frames can be powder coated or anodised to match any design or look.

WINDOWS

STEEL REPLACEMENTS

Before

After

Before

After

Do you have a house with old steel frames with cracked and damaged putty that do not seal properly against the weather elements. You long for a new Aluminium window frame but don't feel like breaking out the old windows and re-painting the plaster work. Then why not go the aluminium replacement route..

* No breaking of plaster or paint touch-up required.

* Minimal dust and dirt created.

* Not overwhelming amount of building contractors in your house.

WOOD REPLACEMENTS

Increase the value of your property with a conversion from old wooden frames to a new look aluminium window. A standard house can be done in about four days. No painting or plastering required. A clean in and out process

SWIMMING POOL COVERS

Having a swimming pool and being able to enjoy it whenever you like is a pleasure, but it is essential to have the devices and means to keep the water and the pool in perfect condition.

Simplicity of design and ease of use.

Aesthetics: finishes off and accessorises the pool area to reflect the style of the entire home.

Child safety / drowning prevention. Pets are also protected from pool-related accidents.

Pool owners can add a stainless steel rail system that sits inside the pool water or a safety ledge around the pool which gives the ultimate peace of mind with regards to pool safety.

Heating: improves the pool's heat retention capacity.

Winterize your pool: A good cover choice for hibernating a pool in winter or when not in use for long periods.

Come spring, the pool is swim-ready with minimal effort required.

Cleaner water: keeps the water significantly cleaner as dirt and debris are prevented from collecting in the pool, allowing one to maintain excellent water hygiene with little effort.

Ease of use: modern convenience at the push of a button.
