ABOUT US

AccuTest Soil (Pty) Ltd. is a soil and materials testing laboratory that aims to provide top quality soil and materials tests in the civil engineering field. Accutest was established in 2016 and became SANAS accredited soon thereafter.

QUALITY

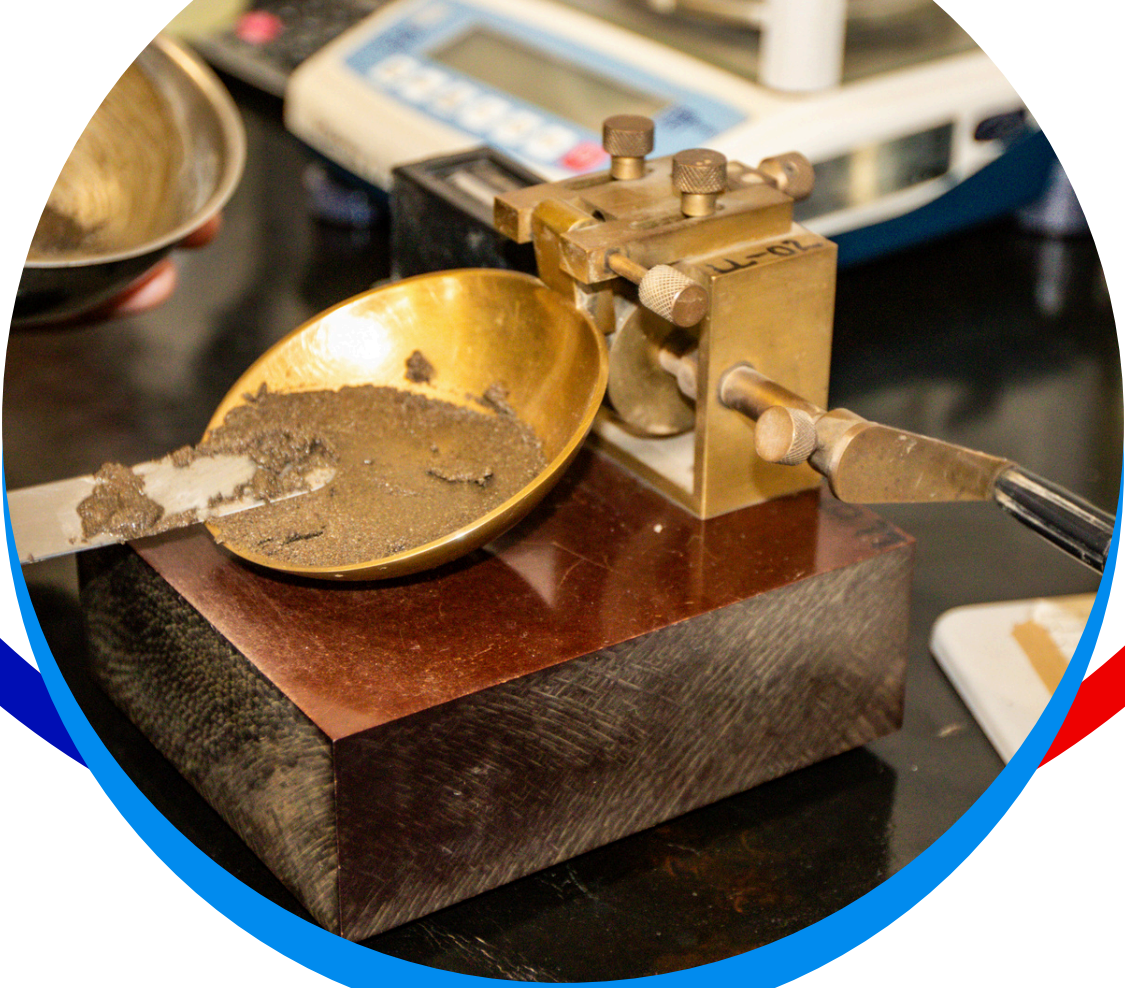

AccuTest takes part in regular proficiency testing schemes (Internal and External) to ensure reliable, repeatable and consistent results.

We are members of the National Laboratory Association - South Africa, where results are compared against ± 30 laboratories nationwide.

Being SANAS accredited means quality is a top priority and a key focus area within Accutest. With regular audits from SANAS and internal audits we constantly improve on quality and efficiency.

“Perfection and customer satisfaction are what drives us. Thus, we take part in regular proficiency testing schemes, internal and external comparison tests to ensure consistent and reliable results. All accredited tests are done by our competent staff and in accordance with ISO 17025.”

VISION

- Make our name synonymous with quality, reliability and accuracy.
- To become a household name in the civil engineering industry and expand our horizons within Africa.

MISSION

- Provide a professional service to clients.
- Deliver accurate and reliable test results.
- Continue excellent turn-around times for test results.

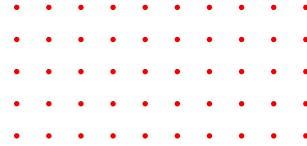

CLIENT RELATIONS

Accutest Soil has built successful and trusted client relationships with a number of leaders in the Civil engineering industry.

Some of our clients include:

- SPEC Africa
- GTC Projects
- Helipower
- JVC Dynamic (Pty) Ltd
- KBK Engineers
- Kijima Construction
- Kingfisher Civils
- Lekwa Bricks (Pty) Ltd
- Mantella Trading 310 (Pty) Ltd
- Munnik & Rosslee Konstruksie
- NAKO Group
- Potwyk Bouers
- Regal Civils
- Stefanutti Stocks Civils
- Concrete 360 Readymix
- Lemjo Trading
- New ERA Engineering
- Secunda Readymix
- Murray and Dickson
- Sky Sprayers
- Jonker Contractors
- Kinross Industrial Supplies
- Sasol

B-BBEE

AccuTest Soil (Pty)Ltd. is an empowering supplier in terms of the Dti codes of good Practice and is a Level 4 contributor.

TESTS WE CONDUCT

AccuTest offers the following SANAS accredited tests on soils, aggregates and concrete:
See Schedule of accreditation for a more detailed description.

Soil:

- Indicator tests (Particle size analysis, Liquid limit, plastic limit and plasticity Index).
- California bearing ratio (CBR).
- Unconfined compressive strength (UCS) - Laboratory and field stabilized materials.
- Indirect tensile strength of cementitious stabilized materials (ITS).
- Determination of the maximum dry density.
- In situ nuclear density tests.

Aggregates:

- Particle size analysis by sieving
- Determination of flakiness

Concrete:

- Making and curing of test specimens.
- Slump tests.
- Compressive strength tests of hardened concrete.

List of tests conducted:

- Foundation indicator
- Field density: sand replacement method
- Bulk density loose
- Schmidt hammer test
- Core drilling
- DCP's
- ACV
- ALD
- 10% fact
- Hydrometer
- Apparent density
